RESUMO

I have a degree in Biological Production Engineering in 2006 from the Biotechnology School of the Portuguese Catholic University. From an early age I fell in love with the food sector due to a family business in vegetable production where we had connections with vegetable processing companies and markets such as MARL (Lisbon Market). Later, during an internship at a distillery in Gent (Belgium), I realized I was a "fish in water" in the food industry. I started my activity in the frozen food sector and during that time I attended a Master in Food Engineering and Nutrition and a Post-Graduation in Integrated Management Systems. At the same time I started my activity as a trainer in quality and food safety.

In 2010 I joined Frutóbidos (Ginja d'Óbidos Vila das Rainhas), and started my activity as consultant/auditor in Integrated Management Systems. At the same time I started as a trainer and examiner for Occupational Safety Technician courses.

Since then I support the implementation and auditing of Management Systems. I often increase my skills with the acquisition of know-how in various companies, in training and events in which I actively participate. In 2017 I joined the TUV Rheinland Portugal auditors and in 2019 Bureau Veritas Certification and DQS. In 2018 I created QSconsult, being already a portuguese reference in the implementation of systems with strong connection to the GFSI standards for the food sector.
